JASMIN JAHAN PUSPO

jasminjahanpuspo@gmail.com jasminjahanpuspo.github.io (+880) 1842429020

EDUCATION

M.Sc (Engg.) Shahjalal University of Science & Technology — January 2023 - Present
Major: Computer Science & Engineering

B.Sc (Engg.) North East University Bangladesh — January 2017 - June 2021
Major: Computer Science & Engineering
CGPA: 3.54/4.00

RESEARCH INTEREST

- Medical Imaging
- Computer Vision
- Machine Learning

RESEARCH EXPERIENCE

Undergraduate Thesis | NEUB — Sylhet, BD
Supervisor: Muhammad Mahir Hasan Chowdhury — July 2020 - June 2021

- Segmented gray images (MIAS Dataset) via the Mask R CNN algorithm
- Classified shapes using CNN to obtain their stages.

TEACHING EXPERIENCE

Sylhet International School and College — Sylhet, BD
ICT Teacher(3rd - 8th grade) — September 2022 - December 2022
Responsibilities:

- Prepared lesson plans including laboratory class, lecture, exam, and homework.
- Graded papers, made questions, and took class tests.
- Reported students' performance weekly to the school board.

WORK EXPERIENCE

Russkin Bright — Sylhet,BD
Content Writer (Remote Job) — October 2022 - May 2023
Responsibilities:

- Researched and created engaging curriculum, modules, and MCQ for various courses.
- Wrote sales content of 300-450 words by maintaining 100% quality and zero plagiarism.

PERSONAL PROJECTS

Fully Automatic Computer-aided Mass Detection and Segmentation via Pseudo-Color Mammograms and Mask R-CNN:

- Conceptualized and implemented this research paper.
- Reduced image size using MatLab; Data size: 8.38 GB; Mask R CNN algorithm experimented on Gray and PCM images and predicted 67% and 87% accuracy.

Object Detection & Segmentation:

- Gathered and annotated data (15 images) from the internet; Created charts in Google Colab to perform preliminary analysis and visualize data using Matplotlib.
- Detected and segmented aimed objects via the Mask R CNN algorithm, leading to 95% success.

Academic Projects

Breast Cancer Classification:
- Utilized an ideal CNN model to classify the binary cancer stage with 95% accuracy on the MIAS dataset.

Bangla Money Recognition-Kaggle:
- Classified Bangla Nine notes with KNN, Linear Regression, and CNN algorithms from scratch and compared them with Scikit Learn libraries to obtain similar accuracy.
    - Key achievement: Github Arctic Code Vault Contributor 2020.

Titanic Survival Prediction-Kaggle:
- Trained Random Forest and KNN algorithms to predict such that passengers would survive or not and received a 71% score.

Tic Tac Toe:
- Designed a 5*5 GUI interface in Python using the Tkinter module that decides whether a player wins, loses, or ties with the computer.

Object Info:
- Collected short descriptions and a single image of 25 objects from the internet as input; identified and briefly described an object with pronunciation as output.

Desktop Application:
- Could perform a search for specific files from the local hard disks written in Java.

Line Follower Robot:
- The four-wheeled robot passed in a particular direction, i.e., lines (90, 180 degrees) and angles (V, U shapes).
    - Key accomplishment: Placed second in the NEUB ICT Fest 2018.

Vision-based Vacuum Cleaner:
- Avoided the frontier obstacles automatically while vacuuming the floor.

Study Management System:
- Designed and established a user-friendly website with PHP, HTML5, CSS3, and MySQL where students could store their study materials.

Medicare:
- Established an interactive website that uses PHP, HTML5, CSS3, and MySQL to provide health-related information.

Technical Skills

Programming Languages: Proficient in C, Java, Python
Data Analysis Tools: Scikit-learn, OpenCV, Numpy
Deep Learning Frameworks: TensorFlow, Keras

Courses on DataCamp

Biomedical Image Analysis in Python by Stephen Bailey — certificate
Image processing in Python by Rebeca Gonzalez — certificate

Leadership Experience

Private Tutor — Sylhet, BD
- Tutored for high school and college students to achieve better grades — May 2013 - Present

Languages

Bangla: Native Language; **English**: Fluent Language; **Hindi**: Fluent Language

Last Update: 31st May 2023
